

Thursday 27 April 2023, Online

European Green Infrastructure Day (EGIDay) is an annual policy conference dedicated to exploring the state of affairs of urban green infrastructure in the European Union and how to foster their uptake.

The event gathers EU policymakers, green roof industry leaders, experts and NGOs to discuss how to turn European cities from grey to green and contribute to the EU climate and energy transition. **Please find the full agenda on the following page.**

EGIDay is organised by the **EU Chapter** of the **World Green Infrastructure Network (WGIN)**.

About the World Green Infrastructure Network

The World Green Infrastructure Network (WGIN) is a collaborative global network promoting the integration of green infrastructure in urban planning. Since 2009, WGIN has expanded to represent 22 National Associations and has held 10 World Green Infrastructure Congresses. WGIN has established supportive working research committees and has an active board of directors representing 11 nations. In 2019, WGIN set up a European Chapter to raise awareness among EU policymakers about the multiple benefits of green infrastructure. Our motto is “vegetation makes it possible”.

SESSION I: 10:00 – 11:00

Green, efficient and solar-powered: key features of a sustainable building stock
